VINYL FLOORING WITH MINERAL CORE

SUPERIORE

TECHNOLOGY

We are a flooring industry company dedicated to utilizing state-of-the-art technology and offering advanced products to our clients. Our emphasis on technological advancements ensures we consistently provide high-quality, modern flooring solutions.

INNOVATION

We are an European leader in the production of floor accessories. We offer advanced and innovative products. We are pushing the flooring industrie forwards for the more effective, ecological and durable solution.

DESIGN

Every year A.DESIGN STUDIO analyzes trends, changes in consumer preferences and hundreds of new floor colors. That's why we can create customer orientated solutions and stay relevant.

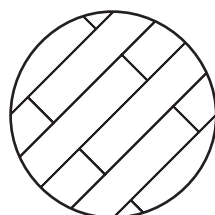

Our latest collection of HD Mineral Core flooring boasts the longest planks in the world, measuring a staggering 2.18 meters in length. These extra-long planks make for an incredibly seamless and sophisticated look, perfect for large spaces and modern interiors.

In addition to their impressive length, our SPC panels also feature a synchronized structure that mimics the natural texture and pattern of wood, giving them an authentic and elegant appearance. Each of the 8 colors in our collection includes 10 unique planks.

TECHNOLOGY

We are a flooring industry company dedicated to utilizing state-of-the-art technology and offering advanced products to our clients. Our emphasis on technological advancements ensures we consistently provide high-quality, modern flooring solutions.

Modern times become more and more hectic, full of challenges and responsibilities. We live fast, try to make the most of every single moment. We are pushed to look for new solutions, technologies and clever ways to adjust items all around us to meet needs and expectations. With this in mind, **Arbiton HD Mineral Core®** floor was created. This floor impresses and surprises with practicality. Inspired by nature, vinyl floors are entirely designed by European A.Design Studio. Created for people just like you, who get the most out of each moment and enjoy the life to the fullest. The Arbiton floor design not only matches the latest trends, but also go ahead of times and creates them. Thanks to the timeless design its beauty will amaze you every day.

BEAUTIFUL & PRACTICAL

The pace of our life direct us towards solutions that will support and enhance us in everyday situations. That is why **Arbiton HD Mineral Core®** floors have been designed for their maximum comfort of use. Due to their advanced technical properties, they can be installed in any room without expansion joints between rooms. This allows to have beautiful, unified floor throughout the whole level of the apartment. With complete waterproofness and low thermal resistance they are perfect to fit in bathrooms with underfloor heating. They are easy to clean and antistatic, which prevents dust from adhering to them. Moreover, thanks to the innovative Antiscratch - Titanium Nano Layer they are up to 30% more scratch resistant. All of these features and properties mean that you get a floor which will meet the demands of our time. With Arbiton floor you can enjoy life thanks to not only its beauty but also a peace of mind with guaranteed unique functional properties.

BEAUTIFUL

Unique and realistic wood design selected from the most beautiful wood type in the world.

The widest plank available on the market - 229 mm - beautiful and the most natural looking floor.

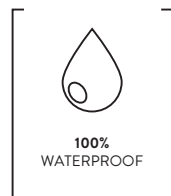

Soft, delicate and mat finished flooring - the best representation of a real wood.

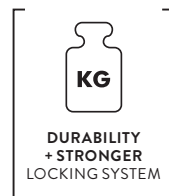

Nice and silent in everyday use vinyl flooring brings comfort and serenity to everyday life.

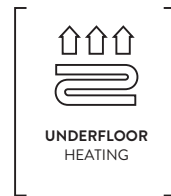

PRACTICAL

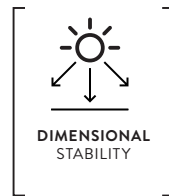

No need to be scared of water. Our floors are 100% waterproof. Frequent cleaning or spilled drinks are no longer dangerous to your floor. Without concerns you can connect your kitchen floor with the rest of your living space.

HD Mineral Core® primarily means extremely strong locking system which gives the whole flooring system a maximum durability. Despite of small thickness of the plank our locks are 2 times stronger than average LVT locks available on the market.

Very low thermal resistance of our floors means more effective use of the underfloor heating system. Thanks to HD Mineral Core® less fuel is needed for floor heating and over 60% less carbon is released into the atmosphere from one household in Europe, each year.

HD Mineral Core® also means high dimensional stability of the floor even in very sunny rooms. We offer at least 2 times higher dimensional stability of our floors in comparison to traditional LVT.

DIMENSIONAL STABILITY
(EN ISO 23999) up to 0,05%

OUR TECHNOLOGIES

Since introducing the mineral core flooring to the market in 2018, we have been continuously developing our technology. Each year, we introduce new innovations, such as the advanced ANTISCRATCH surface, which provides 30% greater protection against scratches.

We also implement innovative synchronous structures with low pattern repetition, creating a unique and visually appealing product.

These changes and innovations are made possible thanks to our in-house research laboratories and dedicated teams of technologists. Our commitment to innovation ensures that we remain at the forefront of the flooring industry.

In our laboratories we've discovered an innovative combination of natural rock minerals and advanced polymers. Carefully combined proportions ensure maximum performance of the floor. Our HD Mineral Core® provides extreme durability. We are proud of the quality of our HD Mineral Core® core free of phthalates and ANY plasticizers.

Our vinyl floor structure impeccably replicates the natural appearance of wood, boasting a significantly higher resolution than standard products. Additionally, the design offers remarkable uniqueness, with up to 10 distinctive planks in each color variant, ensuring a truly authentic aesthetic.

In 2020, the ANTISCRATCH technology was introduced, effectively eliminating the most common issue with vinyl flooring - micro-scratches - and providing enhanced durability for the flooring surface.

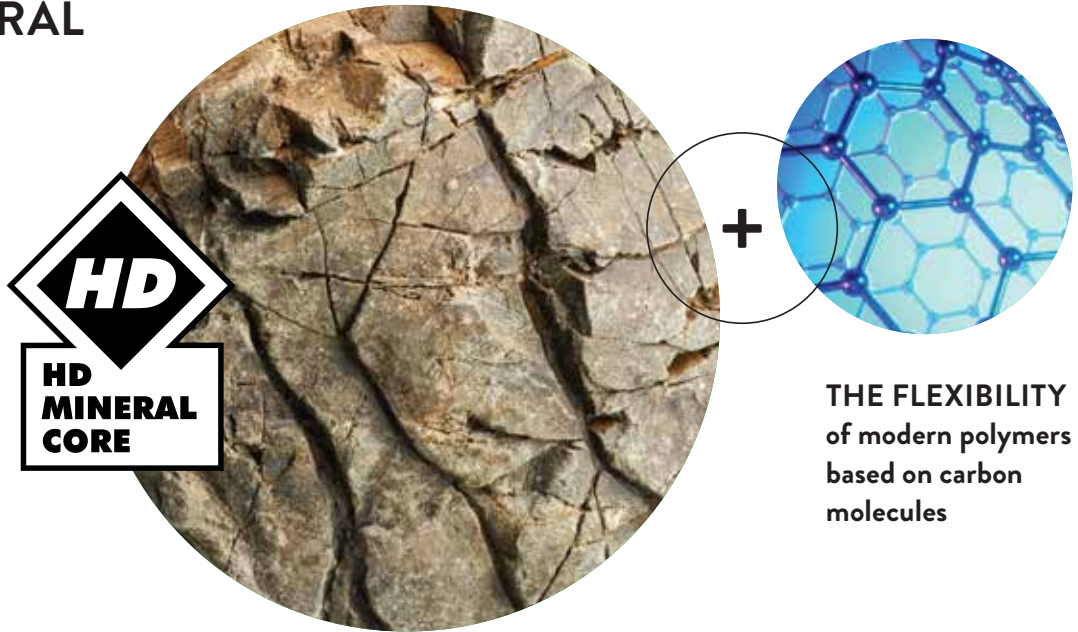

A suitable underlayment for click vinyl is essential, as it not only provides acoustic insulation but also contributes to the durability of the flooring, making it crucial to select an underlayment tailored to your specific needs.

**DESIGN

For last couple of years, professional automotive workshops offer protection of a paint layer. For additional fee, we can protect the paint coating with specially selected cosmetics. This service is mostly done on the new car even before it has left the dealership. The factory lacquer coating is being covered with ceramic or nanoparticles coating.

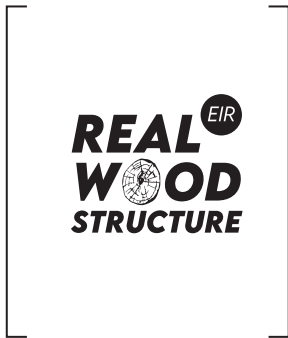

This service satisfy the most demanding customers who want to enjoy the beautiful appearance of the car for years. Antiscratch - Titanium Nano Layer is inspired by these premium automotive detailing process. Antiscratch - Titanium Nano Layer protects the panels and secure them against micro scratches that can occur in the regular lifespan of use.

The Antiscratch - Titanium Nano Layer protective coating is available in the top Arbiton collections - Amaron and Woodric. Technology used in these collections outperform in durability and scratch-resistance tests the majority of vinyl panels on the market. As a result sand, or even mud are no longer a threat because of the Antiscratch - Titanium Nano Layer and waterproofness protection. This means that Arbiton Amaron and Woodric can be easily installed in kitchens, dining rooms or even in bathrooms. And all these rooms can be unified – up to 200 m² without additional expansion joints. The combination of HD Mineral Core[®] and Antiscratch - Titanium Nano Layer guarantees a beautiful floor for many years.

REAL WOOD STRUCTURE

High variety of designs means more natural impression of flooring. Perfect resemblance of wooden boards is a key benefit of our new collections. Minimum of 10 different planks in each colour means naturally flowing design without repetition of grains and knots.

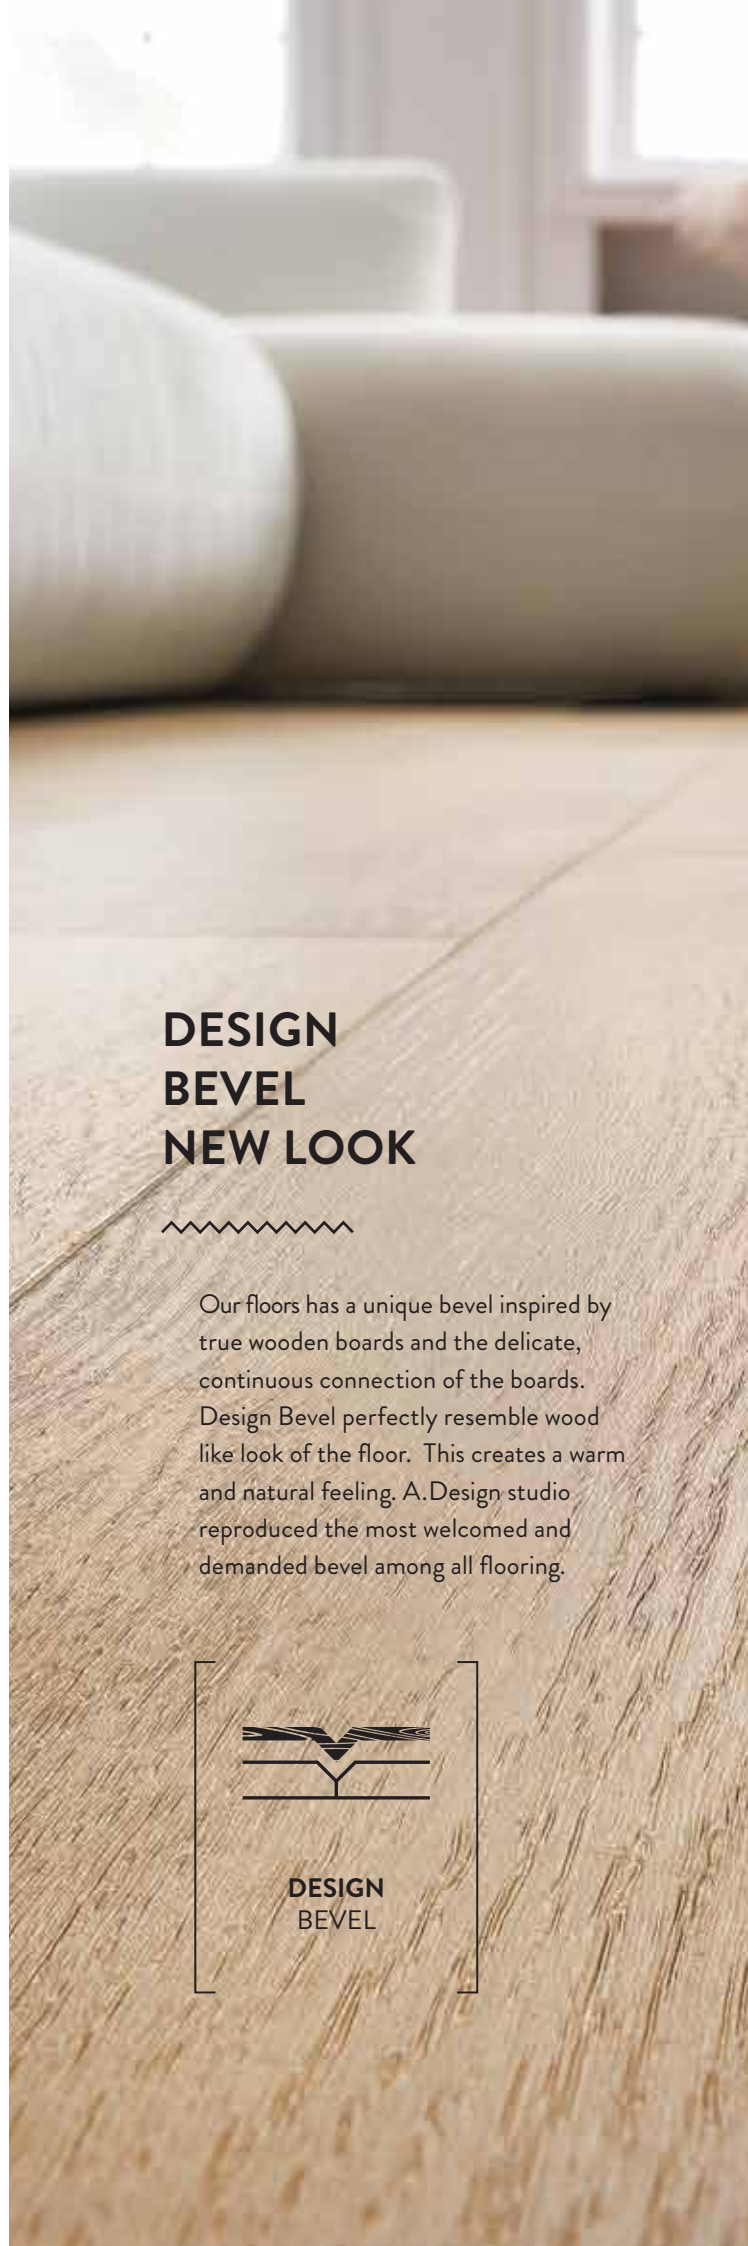

**DEEP MATT
SURFACE**

**NATURAL FLOW
OF DESIGNED
STRUCTURE**

**HIGH RESOLUTION
EMBOSSING**

For those who strive for the best looking floor and high durability we have prepared an absolute novelty. Our new collections is made using embossing technology perfectly resembling wooden structure on a planks.

The EIR (embossed in register) technology we are using allow us to achieve higher resolution of embossing, meaning higher density of details enriching surface of planks. Our design has more knots, grain, clear figure, small indentation that create real wooden characteristic of the plank. A beautiful matte surface will gently emphasize the beautiful finish of the floor.

DESIGN BEVEL NEW LOOK

Our floors has a unique bevel inspired by true wooden boards and the delicate, continuous connection of the boards. Design Bevel perfectly resemble wood like look of the floor. This creates a warm and natural feeling. A.Design studio reproduced the most welcomed and demanded bevel among all flooring.

**DESIGN
BEVEL**

We make use of the reputable Välinge company's license to ensure the highest quality for our flooring products. By incorporating their innovative locking system into our floors, we guarantee durability and ease of installation.

A DESIGN STUDIO.

OAK-INSPIRED FLOORING MASTERY

Our oak wood-inspired flooring is perfect for those who appreciate the elegance and charm of natural wood, but also want a practical and modern flooring solution. Our flooring products can be installed in a wide range of settings, from residential homes to commercial spaces.

Our design studio specializes in creating stunning decor that reflects the look and feel of oak wood. We scour the world to find the finest quality oak wood and carefully study its unique patterns, grains, and colors.

Using advanced techniques and innovative technology, we replicate these natural elements in our flooring products. The result is a flooring solution that not only captures the beauty of oak wood, but also offers superior durability and longevity.

At our design studio, we take pride in our commitment to quality and our passion for creating unique and beautiful designs. We're confident that our oak wood-inspired flooring will exceed your expectations and add warmth and character to your space.

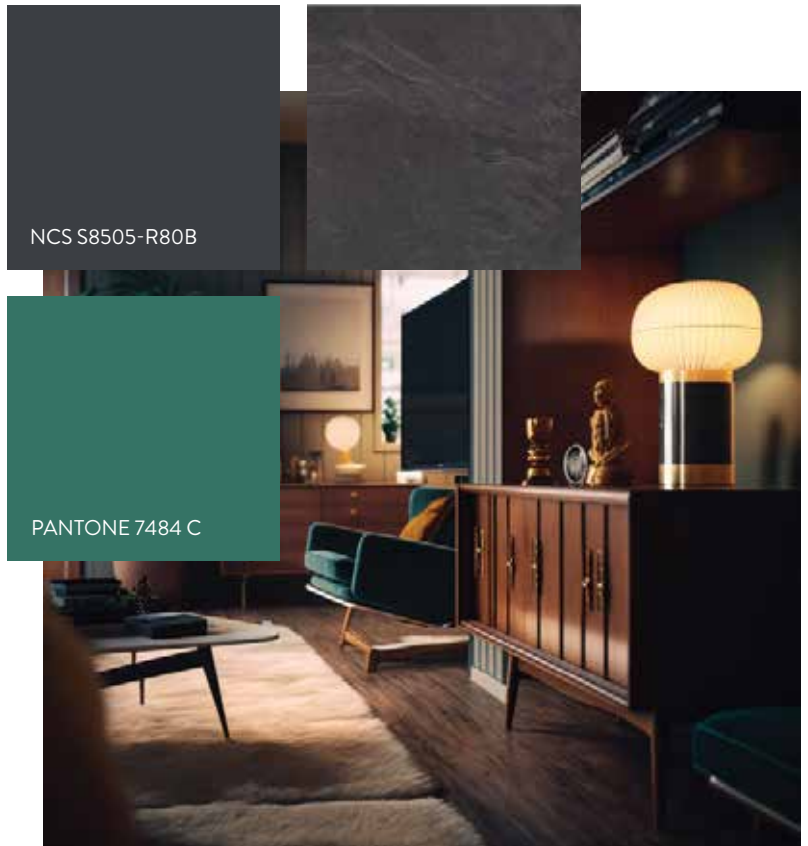

TRENDS

In this chapter of our catalog, we explore the various interior design styles and how the shades and character of flooring can shape the overall look and feel of a space. The choice of flooring can significantly influence the ambiance, whether it's the clean lines of mid-century modern, the industrial charm of a loft, the cozy warmth of hygge, the free-spirited nature of boho, or the minimalist elegance of Japanese and wabi-sabi designs. Each style has its unique aesthetic, and selecting the right flooring can make all the difference in achieving your desired interior design. Let us guide you through these distinctive styles and help you find the perfect flooring solution to elevate your space.

Mid century

Mid-century modern is a design style that originated in the mid-20th century, characterized by its clean lines, organic shapes, and emphasis on functionality. This style pays homage to the iconic furniture designs and architectural trends of the 1950s and 1960s, often incorporating elements such as tapered legs, geometric patterns, and a mix of natural and synthetic materials. The color palette for mid-century interiors typically includes a combination of neutral tones, vibrant colors, and earthy hues, reflecting the optimism and innovation of the era. In mid-century spaces, minimal ornamentation and an open layout create a sense of flow and harmony, allowing the iconic furniture pieces and accessories to take center stage. When it comes to flooring, oak floors with a warm, medium-toned finish and a subtle grain pattern are a perfect match for the mid-century style, providing a timeless and elegant backdrop that complements the distinctive design elements and adds a touch of warmth to the overall aesthetic.

Hygge

Hygge, a Danish concept that embodies a sense of coziness, warmth, and well-being, has gained significant popularity in the world of interior design.

Hygge-inspired spaces prioritize comfort and create an atmosphere of tranquility, often featuring soft lighting, plush textiles, and an emphasis on natural materials.

The color palette for this design style is typically neutral, with subtle hints of earthy tones and pastels that evoke a sense of calm and relaxation. Hygge interiors are designed to encourage connection, mindfulness, and the enjoyment of life's simple pleasures. In terms of flooring, oak floors with a light, soothing color palette and a natural, matte finish are an ideal choice for a hygge-inspired space, seamlessly blending with the gentle ambiance and promoting an overall sense of warmth and contentment.

Boho

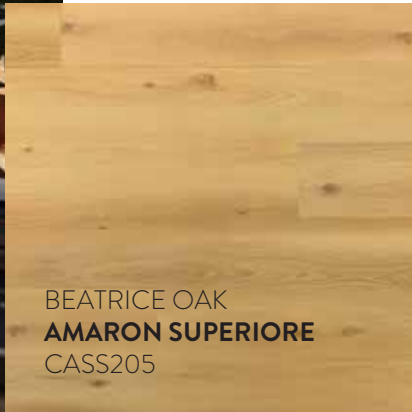

Boho, short for bohemian, is an eclectic and free-spirited interior design style that embraces a mix of colors, patterns, textures, and cultural influences. Boho interiors are characterized by a relaxed and inviting atmosphere, often featuring an abundance of greenery, vintage furniture, and a variety of decorative accents. Layering different textiles, such as rugs, throws, and cushions, is a key element of this design style, as well as incorporating a diverse range of art, antiques, and travel souvenirs. Boho spaces celebrate creativity, individuality, and the art of self-expression. When it comes to flooring, oak floors with warm, rich tones and a slightly distressed or aged finish provide the ideal foundation for a boho-inspired space, adding an authentic, lived-in charm that enhances the overall aesthetic.

Japandi

Japandi, a unique fusion of Japanese and Scandinavian design principles, has emerged as a popular interior design trend that brings together the best of both worlds. By combining the simplicity and minimalism of Scandinavian design with the elegance and sophistication of Japanese aesthetics, Japandi creates a harmonious balance between form and function. This design style emphasizes clean lines, natural materials, and a neutral color palette, creating a sense of serenity and tranquility within the space. Japandi interiors often feature a mix of wood, stone, and natural textures, as well as an emphasis on craftsmanship and attention to detail. When it comes to flooring, oak floors with a subtle, muted color palette and a natural, matte finish perfectly complement the Japandi style, echoing the warmth and timeless character of this design philosophy.

MATTARI OAK
AMARON WOOD
CAS221

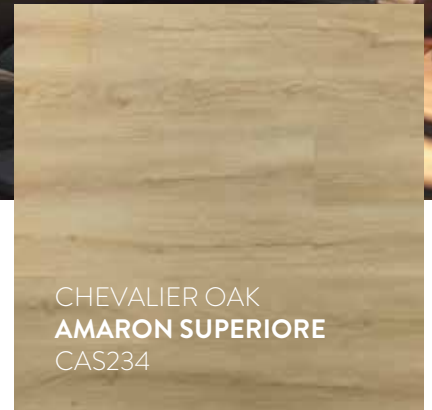

Wabi Sabi

Wabi-sabi, a Japanese aesthetic philosophy, is centered around embracing the beauty of imperfection, impermanence, and simplicity. In interior design, wabi-sabi spaces celebrate the raw, organic, and unrefined aspects of life, often featuring natural materials, handcrafted elements, and a minimalist approach to decor. The color palette is dominated by subdued, earthy tones that evoke a sense of serenity and harmony with the natural world. Wabi-sabi interiors encourage mindfulness and appreciation for the imperfect charm of objects and spaces, fostering a deeper connection to the environment. When it comes to flooring, oak floors with a subtle, weathered appearance and a matte, organic finish are a perfect complement to the wabi-sabi style, echoing the philosophy's emphasis on embracing the inherent beauty of natural imperfections and the passage of time.

Loft

The loft style, inspired by the industrial and urban environments of converted warehouse spaces, is characterized by its open-concept layout, high ceilings, and exposed architectural elements such as brick walls and metal beams. In interior design, loft spaces typically feature a blend of raw, rugged materials and sleek, contemporary furnishings, creating a unique atmosphere that is both stylish and functional. The color palette for this design style is often neutral, with bold accents and a mix of textures to add visual interest and depth. Loft interiors emphasize the use of repurposed, vintage, and industrial elements, resulting in a space that feels both modern and full of character. When it comes to flooring, oak floors with a dark, rich color palette and a slightly distressed or reclaimed finish are an excellent choice for a loft-inspired space, enhancing the industrial aesthetic and providing a strong, durable foundation for the overall design.

INNOVATIONS

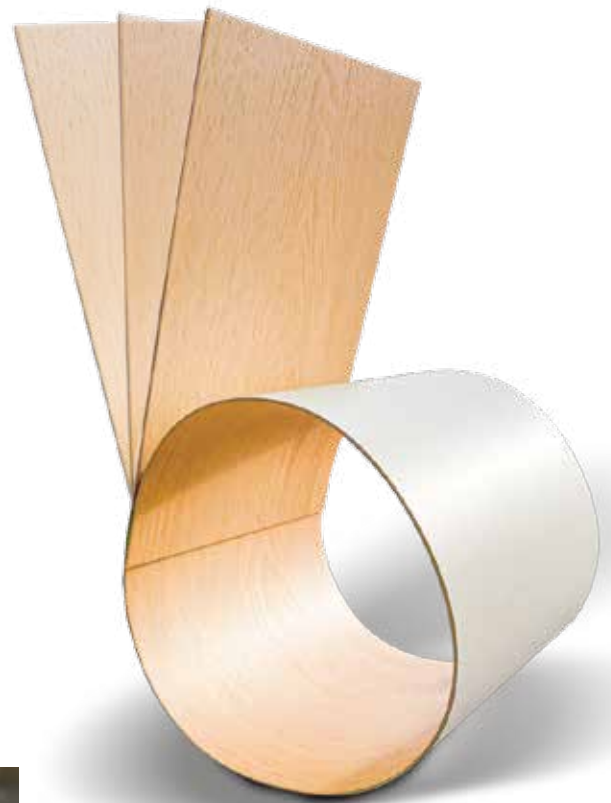

WORLD'S FIRST MINERAL DRYBACK COLLECTION:

EXPERIENCE THE VERSATILITY OF DRYBACK

Arbiton breaks new ground with the innovative Mineral Dryback technology.

Featuring the cutting-edge HD Mineral Core, is a first mineral dryback in the industry, delivering exceptional dimensional stability that prevents gaps between panels.

ONE FLOOR,
MANY APPLICATIONS

Restaurant

Hotel

IT'S DIMENSIONALLY STABLE

With its legendary dimensional stability of 0,05%, you can get rid of the annoying and unsightly gaps that appear at the panel joints after several seasons, especially in variable climatic conditions.

IT'S PERFECT FOR FLOOR HEATING

$R=0,01 \text{ m}^2\text{K/W}$! Next to ceramic tiles, it is probably the most effective floor covering for underfloor heating in the world!

IT'S FLEXIBLE

You can work with it like with any other lvt dryback, you can use the same tools and work in the same way.

IT'S TESTED & APPROVED

Tested and recommended by all major adhesive manufacturers like UZIN, MAPEI, BOSTIK, KIESEL, ARDEX, BAUTEC, WAKOL

IT'S EVEN MORE DURABLE

The Mineral Dryback floor made in HD Mineral Core technology is even more durable. Usability Class 33/42, Antiscratch Titanium Nano Layer and parameter of $RI=0,02$ makes it a perfect choice for commercial use.

IT'S SUPER SILENT

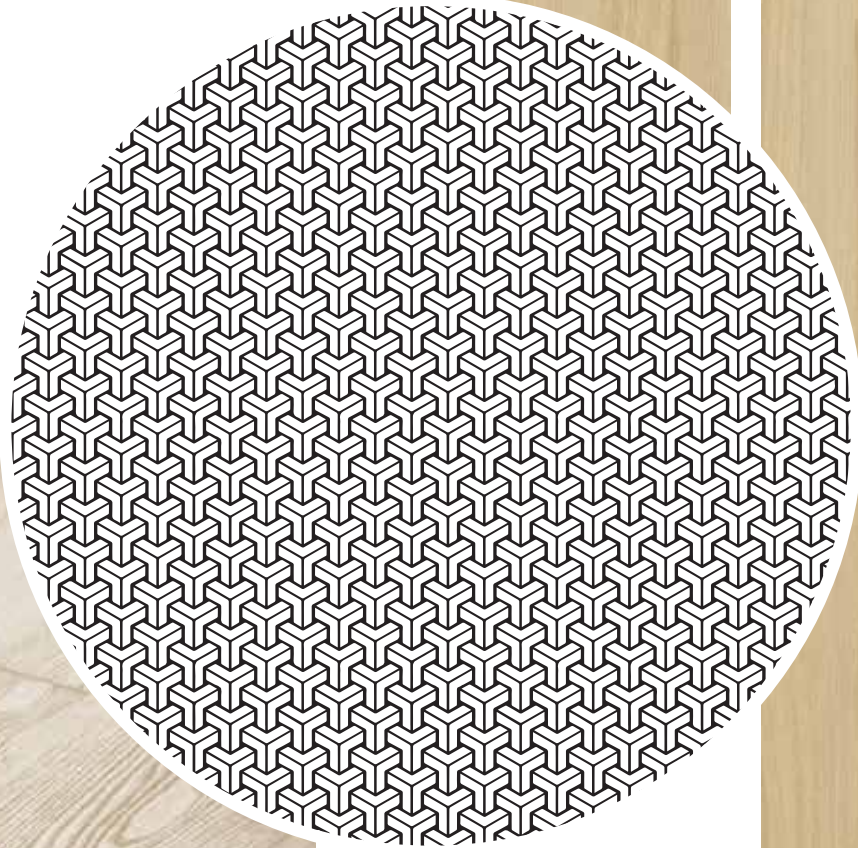

Yes, it is! if you need a really quiet floor, a glued mineral dryback is the best choice.

ACULAY - ACOUSTIC FLOORS

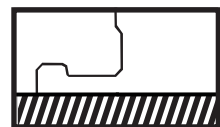

We are proud to introduce our new vinyl floors with a mineral core, featuring an integrated acoustic underlay called ACULAY. This innovative combination of panel and underlay provides a faster and easier installation process. As a European leader in underlay production, we guarantee that the ACULAY underlay is highly durable and meets all MMFA standards. Additionally, it offers an impressive sound reduction of 19 dB, and with a strength of 400 kPa, it is perfectly suited for use in all residential spaces.

AMARON WOOD

Amaron WOOD means expressive designs which will create the character of the interior. The floors in this collection have the highest usage class, created for the most demanding customers. This floor will play first fiddle. The 5G lock makes the floor easy and fast to install. A beautiful floor is a crucial element of interior design. It brings character to the unified design or lets you play a bit with contrast in modern or typically loft interiors. In any way, the floor is the element that helps to create an interesting space- where colours, textures and shapes result in the imagined effect-a sense of harmony and undisputed beauty. Having that in mind, we have created Amaron Wood vinyl click floor.

AMARON HERRINGBONE

Fashion passes- just to return later. Trends come and go but precious few hold on for a long time. Our Amaron Herringbone vinyl click floor is designed to belong to the latter group. Thanks to specially designed locking system this collection might be arranged in the iconic English herringbone pattern. This is an amazing way to adjunct traditional interior arrangements. The main element that indicates the direction of the interior style is the floor – any further decisions regarding the interior are based upon it. Furniture, textures, fabrics, accessories – all of those either correspond to the selected floor or stay in opposition on the basis of divergence. Regardless of which approach you choose, you can stay calm knowing that the Arbiton panels will secure you the highest quality.

COMPREHENSIVE FLOORING SYSTEM

UNDERLAYS
SKIRTING BOARDS

UNDERLAYS

MULTIPROTEC VINYL CLICK

Special needs require special solutions. For areas with high level of traffic. Floors with click system require an underlay with high value of Compressive Strength. This is exactly what you can expect from our products. If the underfloor will be used do not worry you are covered – our products also perform well with underfloor heating thanks to the low value of thermal resistance. Additionally, Multiprotec products have a **Bfl-S1** fire class.

www.blauer-engel.de/uz156

SECURA VINYL CLICK

Products dedicated for vinyl floors with click system. Suitable for areas with high traffic level. High CS value improves the quality of the system and increases the durability of the floor. This product is very easy to install and align thanks to accordion form and cutting lines. High IS value - **(IS = 19dB)** for this XPS products allows for implementation in commercial areas where special parameters are required.

MULTIPROTEC VINYL CLICK
